Gabriel statement regarding PFAS (per- and polyfluoroalkyl substances).

Gabriel has for years followed the extensive use of PFAS worldwide in many applications, hereunder fabrics. We have evaluated this to be problematic as these substances have a documented negative impact on the environment and human health (for more information see link below). Because of this yearlong attention we **are not adding any PFAS in the production of Gabriel and our fabrics are free of PFAS.**

If you have any questions, please contact our department for Quality, CSR, and Production at QEP@gabriel.dk

Best regards
Gabriel A/S

Kurt Nedergaard
Director of CSR and Quality
